DATE MAILED: 07/27/2003

Dear Mr. Leubecker,
Herewith we enclose the Credit Card Payment Form for payment of USD 414,- for 46 extra claims added through the multiple dependent claims filed on February 13, 2003.

Our analysis of claims in accordance with 37 CFR 1.75 (b and c) has revealed:

- 3 independent claims (No. 1, 7, 20),
- 4 dependent claims (No. 2, 3, 8, 13)
- 44 claims, contained in the multiple dependent claims:

No. of multiple dependent claim	Number of direct references made therein
4	3
5	3
6	3
9	5
10	5
11	5
14	5
16	5
17	5
18	5

- 15 claims, contained in the claims depending from a multiple dependent claims:

No. of claim, depending from a multiple dependent claim	Number of corresponding multiple dependent claim	Number direct references made in that multiple dependent claim
12	11	5
15	14	5
19	18	5

Thus, the common number of claims is 66.

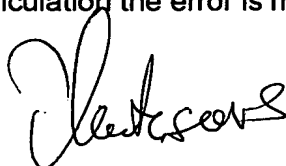

In accordance with 37 CFR 1.16 (c) the payment is made on the basis of USD 9,- for every claim in excess of 20. Therefore, the sum of payment is $(66-20) \times 9 = \text{USD } 414,-$.

If in the above mentioned calculation the error is made, we kindly ask to inform us.

Faithfully Yours,

Inventor and applicant

Patent consultant
